## Climate Change and Human Health Literature Portal

# Healthcare and weather services must work together to limit risks of air pollution and high temperatures

Author(s): Gulland A

**Year:** 2012

Journal: BMJ (Clinical Research Ed.). 345: e7326

**Source:** http://dx.doi.org/10.1136/BMJ.e7326

## **Resource Description**

#### Early Warning System: N

resource focus on systems used to warn populations of high temperatures, extreme weather, or other elements of climate change to prevent harm to health

A focus of content

# Exposure:

weather or climate related pathway by which climate change affects health

Air Pollution, Extreme Weather Event, Meteorological Factors, Precipitation, Temperature

Air Pollution: Particulate Matter

Extreme Weather Event: Drought, Flooding, Hurricanes/Cyclones

Temperature: Extreme Heat

Geographic Feature: M

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Global or Unspecified

Health Impact: M

specification of health effect or disease related to climate change exposure

Infectious Disease, Morbidity/Mortality

Resource Type: M

format or standard characteristic of resource

# Climate Change and Human Health Literature Portal

Policy/Opinion

Timescale: 🛚

time period studied

Time Scale Unspecified
